

Recorded Future for ServiceNow

**Make fast, effective, data-driven
decisions on third-party risks**

Integration Overview

Gain an external view of the security posture of your vendors and partners. Recorded Future's integration with ServiceNow Vendor Risk Management enables third-party risk teams to continuously monitor and assess vendor risk with real-time intelligence.

Continuous Monitoring of Third-Party Vendors

Recorded Future's Third-Party Intelligence integration with ServiceNow enables continuous vendor risk monitoring. The integration provides real-time insights from diverse sources, including dark web forums, ransomware extortion sites, malicious network activity, vulnerable corporate infrastructure, and more.

Using machine learning and natural language processing, Recorded Future generates a clear, quantifiable 0-99 Risk Score for each vendor. Based on their current Risk Score, vendors are categorized into four risk levels (Very High, High, Moderate, Informational), allowing analysts to quickly assess and prioritize potential threats.

Benefits

- Respond quickly to third-party risks with real-time Alerts and context, minimizing potential damage.
- Reduce complexity with automated data collection and analysis to alleviate manual workloads.
- Improve decision-making with actionable insights and essential information to make informed decisions about third-party risks.
- Report on overall third-party risk or vendor-specific risk with easy-to-understand assessments.

Use Cases

- Perform third-party risk assessments for potential vendors or products.
- Monitor third-parties on a continuous basis.
- Respond to third-party incidents with real-time Alerts and context.
- Report on risk stemming from your third-party ecosystem.

*This integration requires:

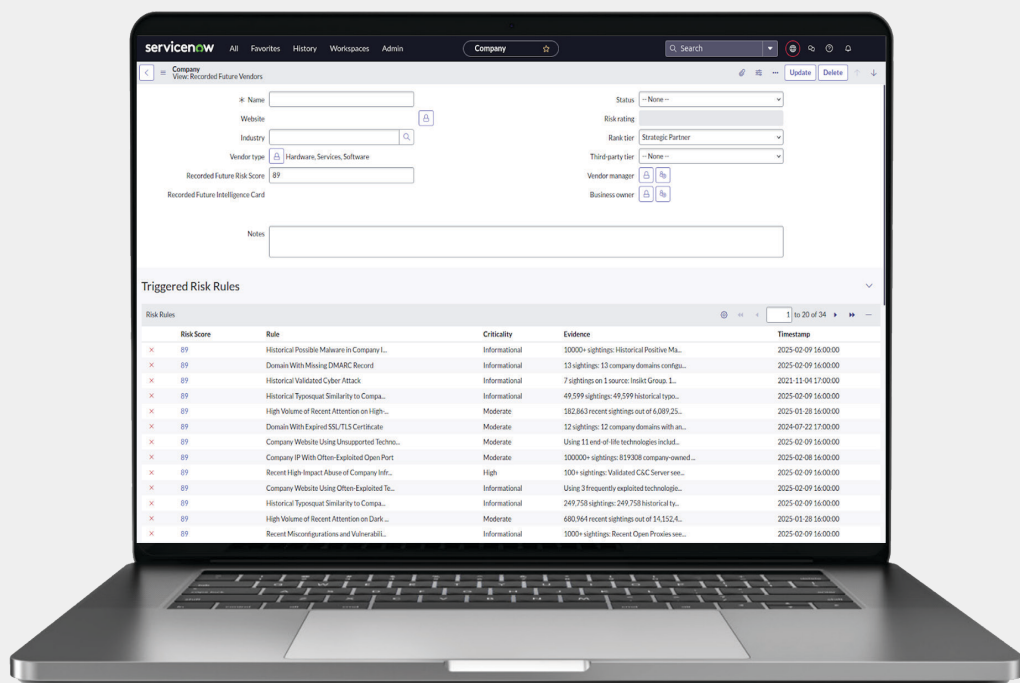

- Deployment of the Recorded Future Third-Party Intelligence module
- Recorded Future API access
- ServiceNow Vendor Risk Management Application

Smarter Risk Remediation

Recorded Future provides immediate visibility into specific third-party threats, enabling ServiceNow users to assess severity and quickly enforce response protocols. Full transparency behind our risk assessments provides the detailed intelligence needed to make informed decisions. By eliminating the need to manually research and aggregate information on risks to third parties, you can significantly reduce investigation time and accelerate mitigation efforts.

Actionable Reporting

Within ServiceNow, the integration provides a consolidated dashboard of vendor risk tracking. This unified view enables GRC, Threat Intelligence, and Supply Chain Risk Management teams to quickly research, share, and understand vendor risk information across departments.
