

Recorded Future and OneTrust

PRODUCT OVERVIEW

OneTrust is the #1 most widely used platform to operationalize privacy, security, and data governance. In the recent Q4 2020 Forrester Wave, OneTrust was named a leader in Third-Party Risk Management Platforms, receiving the highest scores in the strategy and market presence categories. With Recorded Future's Third-Party Intelligence integrated into OneTrust, risk management teams incorporate continuous cyber risk monitoring for every third-party organization in their ecosystems. Users gain unparalleled risk visibility in real-time, allowing them to quickly identify security incidents, malicious network activity, leaked credentials, and dark web attention. Third-party intelligence helps risk teams quickly prioritize and validate their vendor risk assessments.

JOINT INTEGRATION DESCRIPTION

Clients using OneTrust Vendorpedia to manage their portfolio of vendors can have Recorded Future's real time third party intelligence automatically added to their platform for convenient reference. With one simple click, the analyst can then pivot to Recorded Future for further in-depth details. This allows the analyst to quickly assess vendor risks and determine if risk mitigation is needed.

CHALLENGES OVERCOME THROUGH INTEGRATION

Today's increasingly complex and interconnected supply chain creates more opportunities than ever for malicious actors to cause damage to your business. Third-party data breaches are at an all-time high:

- Lack of visibility into third-party risk landscape
- Traditional vendor risk assessments are point-in-time and prone to error
- Manual review efforts are resource-intensive
- Need a better way to prioritize and validate assessments

USE CASES

Vendor Assessment: When assessing a vendor in OneTrust, Recorded Future's third-party intelligence can be automatically incorporated into the vendor's record. The Recorded Future Third-Party Intelligence Score (0-99), Criticality, and associated Risk Summary quickly gives the analyst a baseline of the vendor's cyber risk.

Continuous Cyber Risk Updates On Your Vendors: Recorded Future continuously monitors nearly a million sources in real-time for any information that may point to changes in a vendor's cyber risk score. In OneTrust, updates to vendor third-party intelligence from Recorded Future can be scheduled for periodic refreshes, or pulled on-demand whenever any details on the vendor record are updated.

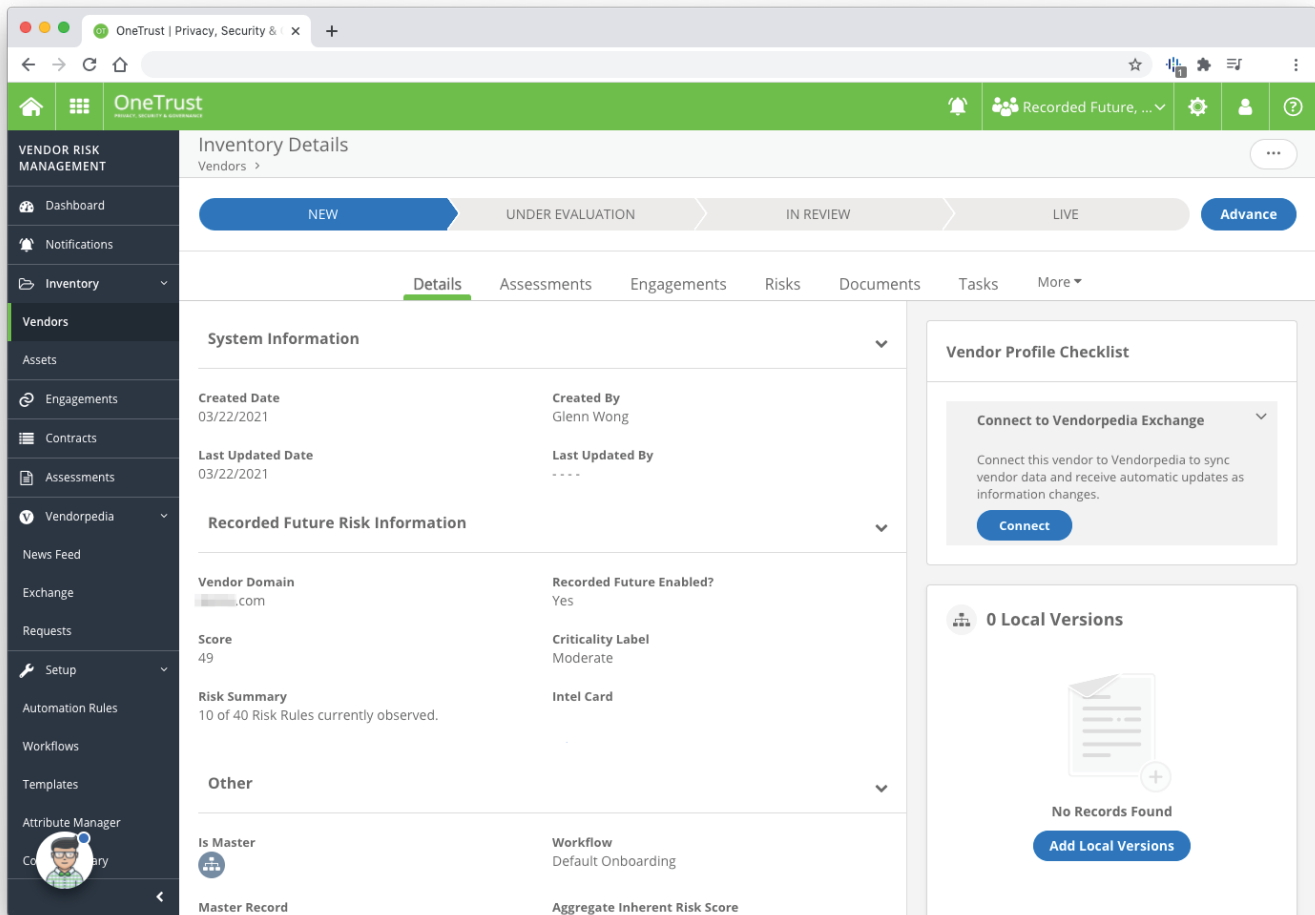

Recorded Future®

OneTrust

PRIVACY, SECURITY & GOVERNANCE

BENEFITS:

- Faster vendor risk assessment:
Validate assessments with objective intelligence
- Real-time continuous monitoring: Identify new risks as they arise
- Smarter risk remediation:
Transparent access to remediation evidence grants leverage to more quickly and effectively mitigate risk

About Recorded Future

Recorded Future is the world's largest provider of intelligence for enterprise security. By combining persistent and pervasive automated data collection and analytics with human analysis, Recorded Future delivers intelligence that is timely, accurate, and actionable. In a world of ever-increasing chaos and uncertainty, Recorded Future empowers organizations with the visibility they need to identify and detect threats faster; take proactive action to disrupt adversaries; and protect their people, systems, and assets, so business can be conducted with confidence. Recorded Future is trusted by more than 1,000 businesses and government organizations around the world.
